Is it only on pdf? Does it do it when you export to word?

Subject: RE: West Report Website Status Update

The website report is finished and showing the correct data, but I've found a bug. The Telerik ReportViewer I'm using to grab the data and put it into a report format is creating the same report ten times. When exported to a PDF, it creates a 20+ page document, rather than a 2 page document.

I'm not sure how to fix the error. I've contacted Telerik but they have yet to respond. I will also send the project to Melissa and Kris and see if they can find a reason behind the unnecessary duplication.

I was having issues with retrieving the data into the report, but, thanks to Melissa, we were able to

sort it out. The report is loading data now. Give me about 2-3 hours to iron out the functionality of the site and some of the text changing features.
